

## What's Inside Wobbly Teeth

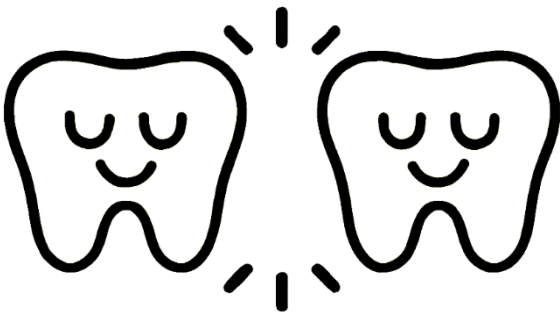

A sensory-safe guide to how baby teeth make space for adult teeth.

## Baby Teeth Wobble

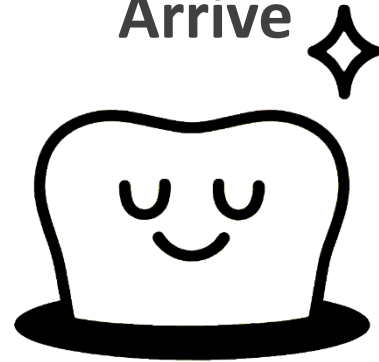

Baby teeth sometimes get wobbly like jelly and then fall out.

## Making Space

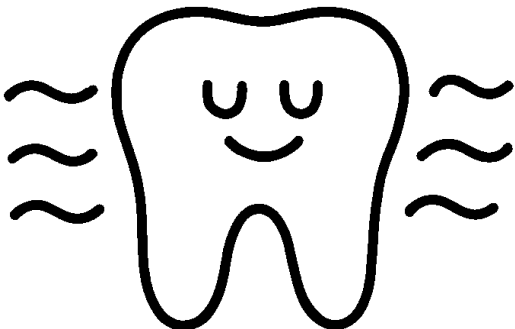

When baby teeth fall out, they make space for new teeth to grow.

## New Teeth Arrive

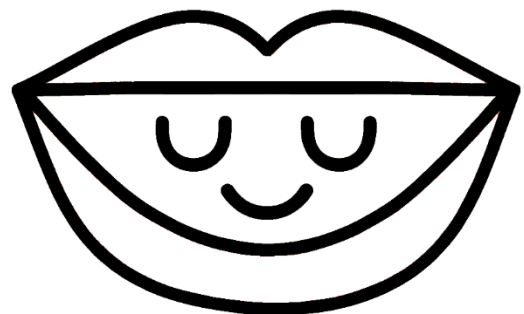

New teeth are stronger and help me eat and smile as I get bigger.

## How It Feels

It's okay if it feels funny — it means my smile is growing too.

## Smiles Growing Strong

New teeth help my smile stay bright and healthy as I grow.
