

What's Inside Toothpaste

A sensory-safe guide to texture, sparkle, and how it helps your smile.

What's In The Tube?

Toothpaste is a mix of cleaning agents, abrasives, and protective ingredients.

Cleaning Agents

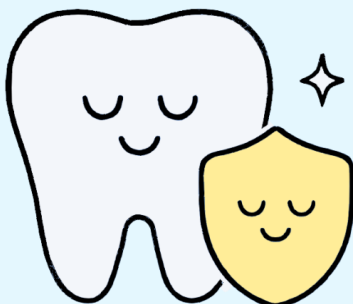

Mild foaming ingredients help spread the toothpaste and clean your teeth.

Gentle Abrasives

Tiny particles help polish the surface of your teeth without scratching.

Fluoride (Often Included)

Fluoride helps protect teeth from decay — not all toothpastes include it.

Flavour & Feel

Toothpaste often includes mint or mild flavour & ingredients to keep it stable.
