

What's Inside Protecting My Teeth

A sensory-safe guide to how sealants & fluoride help teeth sparkle & stay safe.

Shields & Varnish

Sometimes the dentist uses shields or varnish to keep teeth safe & strong.

Tiny Covers

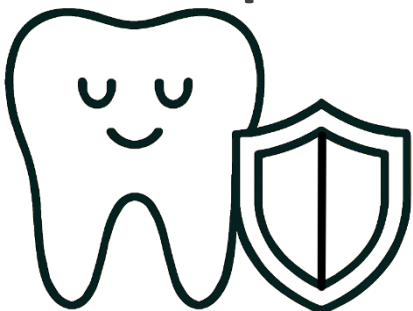

Sealants are tiny covers that stop food from sticking to the chewing surface.

Gentle Varnish

Fluoride is a gentle varnish that helps teeth stay strong and healthy.

How It Helps

Sealants and fluoride work together to keep teeth sparkly and safe.

Sparkle & Safety

These are ways the dentist helps my smile sparkle and stay safe.
